#### **Development History of Single Window**

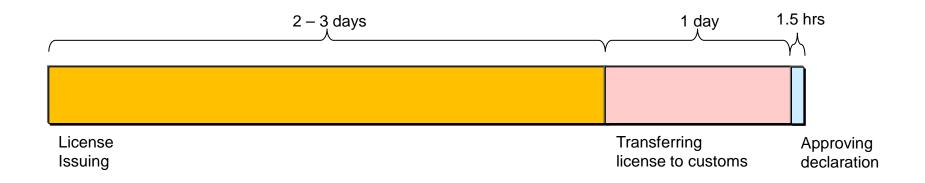

#### **Concept and Scope of Korean Single Window**

#### **Use Rate and Participating Agencies**

#### **Time Saving**

#### **Cost Saving**

#### 2.1 billion USD/Year

Logistics Costs Document preparation Costs

Transaction fee

Low Use Rate

V. Major Challenges

#### I. No higl level legal base for Single Window

- Endless meetings, communication
- High level Political will (Prime minister level) at later stage

#### II. Lack of promotion of the Single Window System

Intensive training program for Stakeholders and Customs brokers

#### III. Low number of participating agencies

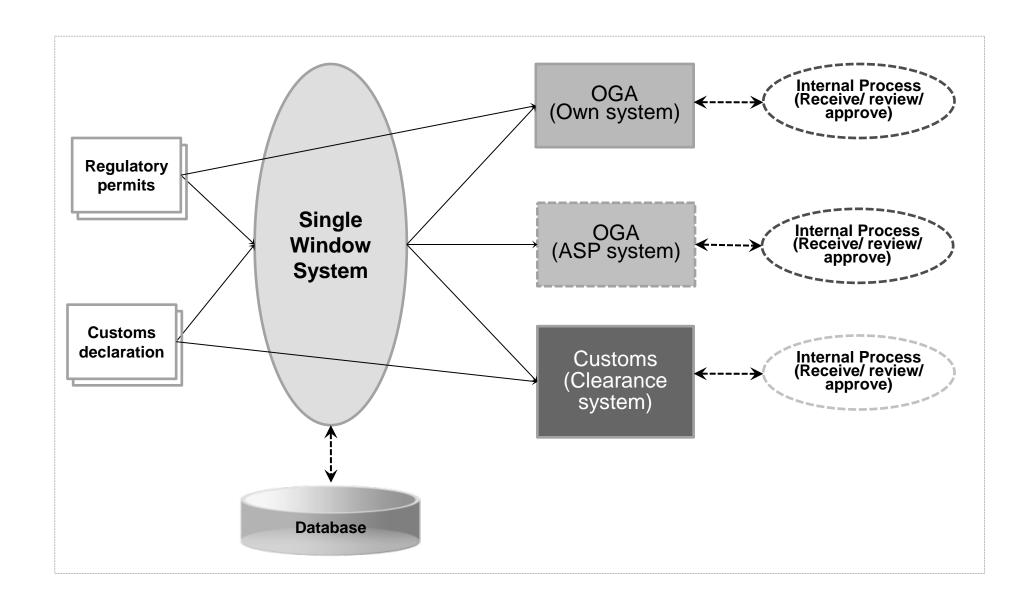

- Reduce friction through mutual cooperation and understanding
- Of the 45 agencies 33 (connected to the SW), remaining 12\* (not connected to the SW)

#### IV. Various agencies did not have an automated license system

- Creation of an ASP-type\* license/approval system inside the Single Window system
- Of the 31 agencies connected: 10 agencies (use own system), 21 agencies (use ASP)

<sup>\*</sup> Local government and local police agencies not specialized in trade-related matters

<sup>\*</sup> ASP: Application Service Provider

# II. CUPIA

# Non profit, semi state owned organization Created by the Korean Customs Services(KCS) in 2006

Organization with sole rights

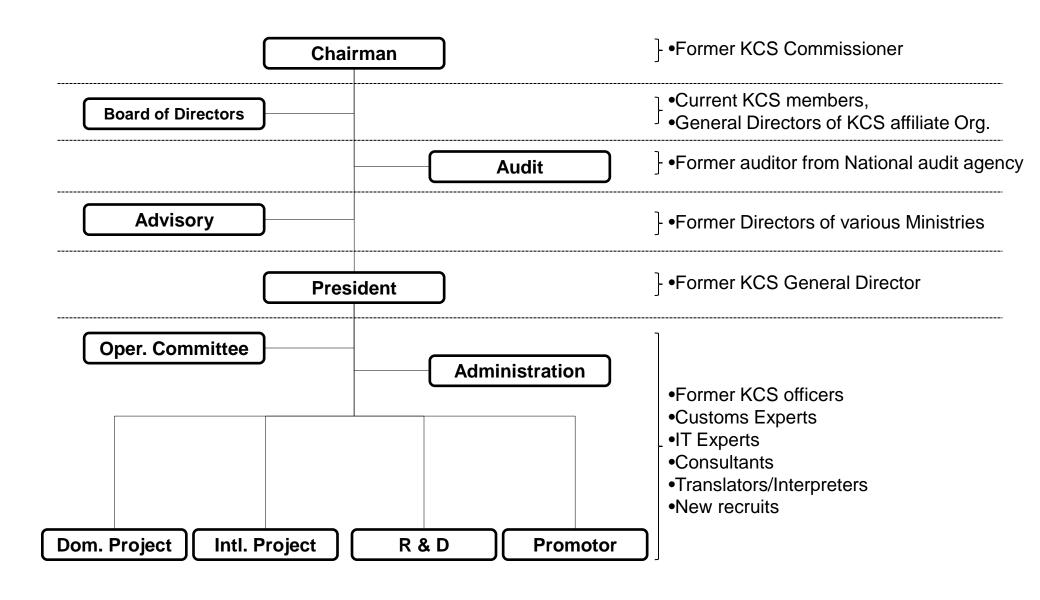

to diffuse the UNIPASS system to other countries

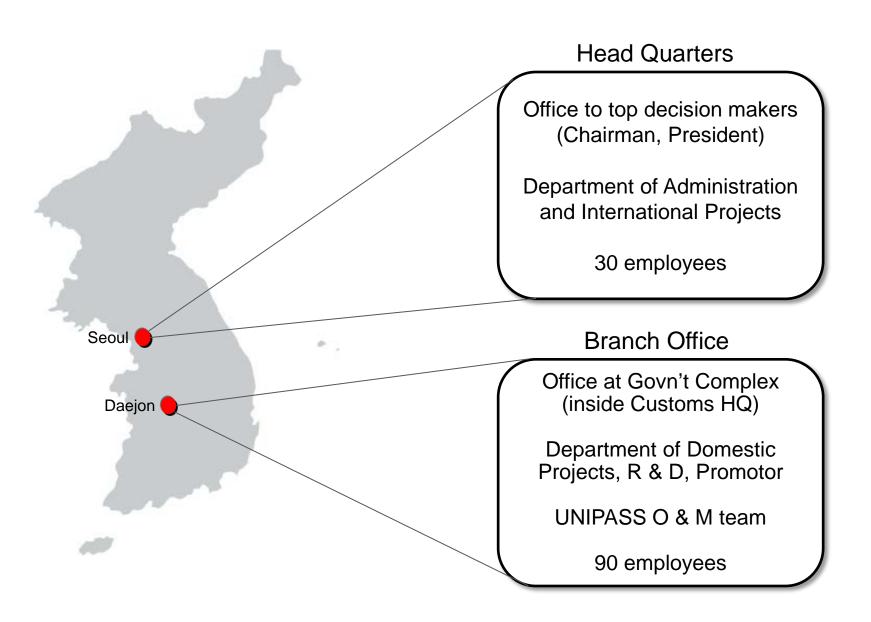

(KCS owns the UNIPASS patent and delegates to CUPIA)

Organization <u>designated by the customs act</u>

to provide O & M of the UNIPASS system used by the KCS

#### **Organization & Human resources**

Major Services except O & M

#### Consulting
